Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Art Unit: 2185

Continuation of 3a.

1. Claims 1, 13 and 23 were amended to require that the cache include the same number of ways as the memory, wherein the cache includes a tag memory storing a plurality of tags corresponding to cache lines stored in the cache and a data memory storing the cache lines, and also to predict a first way of the plurality of ways to be a hit in the cache for the first address responsive to the first value matching one of the plurality of values, and wherein the first way of the plurality of ways in the memory stores the one of the plurality of values. These limitations were not present in previous versions of the claims, and as such require further search and consideration.
2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sam Dillon whose telephone number is (571)272-8010.
